1. VideoTakeOff

A **VideoTakeOff** camera can help the officials to determine whether or not an athlete has a fault jump. This calculates at what distance the athlete has placed his foot to take off for his/her long jump competition.

Advantages:

- Video capture by mouse click
- Video image of the take off, which gives you visual proof of the athlete’s foot position
- Video file conversion for internet applications

TTC-036 VideoTakeOff configuration

- Manual
